# Buddhist Coalition

## For Democracy

## Buddhists working to ensure democracy's survival

# About Us

...and more!

We are a non-denominational Buddhist nonprofit organization with members from multiple traditions and lineages and with differing political opinions who share the **common goal of ensuring democracy's survival.**

We aspire towards a society that **values all of its members** and believe **democratic values, institutions, and processes are the best means for realizing it.** As Buddhists, we are called upon to **witness, respond to, and resist the ongoing systematic destruction of norms and institutions that allow free societies to flourish.**

# Our Commitment

Supporting democracy with methods that are consistent with the Buddhist principles of wisdom, compassion, right speech, and nonviolence.

## Excerpt from our Call to Action:

“ As Buddhists, we recognize our profound interconnectedness and the prime importance of universal compassion and lovingkindness. We affirm the need to listen to differing viewpoints with openness and equanimity and to respond with wise minds and caring hearts. We aspire towards a society that values all of its members and believe democratic values, institutions, and processes are the best means for realizing it. ”
